SUMMARY

A student of the Meteorology Study Program Class of 2020 at Institute Technology of Bandung who is very excited to learn. I am a passionate learner in the field of data science and analysis. Possessing strong analytical and problem-solving skills, I excel in critical thinking and decision-making based on data insights. My effective communication skills allow me to convey complex findings to both technical and non-technical stakeholders. Committed to data accuracy and high-quality standards, I am meticulous in my work. Beyond my technical expertise, I have a keen interest in the beauty industry, motivating me to leverage data and Python for meaningful analysis. I bring a combination of team collaboration, creative thinking, and public speaking skills, acknowledging the ongoing opportunity for improvement in these areas.

PROFESSIONAL EXPERIENCE

Preparation Training for Career in Data Science Series Fundamental Python and Algorithm | Direktorat Kemahasiswaan Institut Teknologi Bandung

- Basic **Python** training in the context of **Data Science** involves understanding variables, data types, control structures, and so on. The ability to manipulate and analyze data using libraries in Python is crucial. In addition to Python, a strong understanding of algorithms is also a primary focus. Algorithm training includes an understanding of time and space complexity, data structures, data analysis, and designing solutions.

Meteorological Information System Project

- Succeeded in creating a meteorological information website “**SIBAPA – Sistem Informasi Meteorologi Pertanian Bali Dwipa**”
- Developing an interactive **web application using Streamlit in Python** results in a responsive and dynamic interface for seamless data display. This application can be **employed for data visualization, statistical analysis, or even building interactive dashboards.**

Climate Policy Course Assistant

- Moderator in discussions on climate policy in Indonesia, the IPCC and the Paris Agreement
- Project on climate change
